Jean Monnet project “EU Commercial Law” is an excellent possibility to improve skills in the branches of EU Trade Law. EU Law is very dynamic. And the organized round-tables in the framework of Jean Monnet project “EU Commercial Law” about the new EU Directives and Regulations is a perfect possibility to be in line with current foreign legislation.

Investment protection is the most important issue for investors and initiators of investment projects. In this case, we achieve the result through competent legal support with the involvement of qualified specialists, which allows to minimize risks, protect assets, identify potential threats and create favorable conditions for successful project development.

Lawyers of Law firm “Galychyna consulting” have unique experience for the Ukrainian market and great connections, for comprehensive support of foreign business in Ukraine, as well as legal support of investment projects of Ukrainian entrepreneurs abroad, including in the EU countries.

We work to ensure legal certainty from the formation of business objectives of the project, which allows a comprehensive assessment of all risks, take into account current issues in negotiations on financial documents, prevent potential threats of litigation, elaborate alternative asset acquisition schemes, and individually design tax and antitrust consequences of the project implementation.

Many thanks to the chief of the project - prof. Valentyna Vasylieva and to the guest-lecturers prof. Boric and prof. Kruczalak-Jankowska.

**Partner of Law firm
“Galychyna consulting”**
